To Whom It May Concern:

As the Chief Operations Officer of several companies, I have had the ability to interact with Mr. Ernst Bergen, P. Eng. in a variety of settings. He has been contracted by me numerous times over an 8 year period.

Mr. Bergen has been instrumental in streamlining our business operations. He has utilized his vast skill set and knowledge to move us to the forefront of innovativeness. With his help, we are now the technological leader in our industry. Mr. Bergen led my executives, and I, through Lean Manufacturing principles and Six Sigma implementation enabling us to decrease wasteful practices and manage the business more prudently. On another project, Mr. Bergen took a major part of our manufacturing process and created a technological solution that was both intuitive and improved our accuracy.

Mr. Bergen's designation of Professional Engineer, not only applies to his training but to his character as well. He is a level headed, intelligent, motivated, professional who thrives when a problem is placed before him. He uses research as part of his problem-solving process; using tools and resources we would never have considered. In one word, he is brilliant.

With his abilities, adaptability, and dedication, Mr. Bergen will no doubt impress you, as he has myself. He will be a great addition to your organization and you will learn to respect his potential to drive your business forward. He treats his clients with such care and integrity that you would believe he owns the business he is contracted to.

If you have any questions, please feel free to contact me at the above address.

Sincerely,

Chris Reimer
Chief Operations Officer
